DETAILED ACTION

Page 2

Claim Objections

1. Claims 1 and 2 are objected to because of the following informalities: Claim 1, line 10 and claim 2, line 10, "a connector" should be --the connector--. Appropriate correction is required.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Singer (5,269,698) in view of Iwano et al. (4,895,425).

Regarding claims 1 and 2, Singer, figures 1 and 2, discloses a galley (the Examiner noted that "for preparing food and drink in an aircraft" are not positively claimed) comprising:

a galley body (10) composed of a panel member (22), a storage unit (32) formed to the galley body for storage a device, and an electric device (12) disposed detachably in the storage unit;

wherein the storage unit is equipped with a rail (34) for guiding the electric device, a pair of guide holders (24a) and a connector (20) disposed between the guide holders;

Art Unit: 2839

wherein the electric device is equipped with a pair of guide pins (88a and 88b) that engage with the pair of guide holders and the connector.

Singer discloses the instant claimed invention as described above except for the guide pins and the guide holders have a photocoupler disposed thereto.

Iwano et al., figures 3A and 3B, disclose a plug-in optical fiber connector having a guide pins (33) fitted in guide holders (22) to made plugs (4) and jacks (5) are engaged with each other, so that optical connection can be achieved (column 7, lines 32-41). The optical connection between two connectors read on the guide pins and the guide holders have a photocoupler disposed thereto. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide Singer to have the plug-in optical fiber connector, as taught by Iwano, for better connection.

Regarding claim 3, it is noted that Iwano et al. disclose a first guide pin and a first guide holder comprising a light emitting member and a second guide pin and a second guide holder comprising a light receiving member.

Conclusion

- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh-Tam T. Le whose telephone number is 571-272-2094. The examiner can normally be reached on 7:30-5:00.
- 5. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TC Patel can be reached on 571-272-2098. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
